PROFESSIONAL SUMMARY

IT Infrastructure / Server Administrator with an M.Sc. in Advanced Networking and Cyber Security and experience supporting day-to-day server operations, Windows administration, Active Directory, Group Policy, system maintenance, OS deployment, backup activities and network troubleshooting. Knowledge and hands-on lab exposure to Microsoft Azure administration, including Azure Virtual Machines, VNets, subnets, NSGs, RBAC, storage, backup, monitoring and connectivity troubleshooting. Seeking an Azure Administrator, Azure Cloud Support or Cloud Operations opportunity.

TECHNICAL SKILLS

Microsoft Azure – Compute: Azure Virtual Machines (Windows/Linux), VM sizing, image concepts, disk management, VM start/stop/restart, availability sets and availability zones concepts, VM Scale Sets concepts.

Azure Networking: Virtual Networks (VNet), subnets, Network Security Groups (NSG), inbound/outbound security rules, public/private IP addressing, NICs, route tables (UDR) concepts, VNet peering, VPN Gateway concepts, DNS, connectivity and RDP/SSH troubleshooting.

Azure Identity & Security: Microsoft Entra ID fundamentals, users and groups, Azure RBAC, role assignments, scope, least privilege, managed identity concepts, MFA and Conditional Access concepts, Key Vault fundamentals.

Azure Storage: Storage accounts, Blob/File storage concepts, containers, access tiers, redundancy options (LRS/GRS/ZRS), shared access signature (SAS) concepts and storage access control.

Backup, Recovery & DR: Azure Backup, Recovery Services vault, backup policies, backup/restore workflow, restore points, Azure Site Recovery concepts and disaster recovery planning.

Monitoring & Governance: Azure Monitor, metrics, activity logs, Log Analytics concepts, alerts, resource health, Azure Service Health, resource locks, tags, Azure Policy and cost-management fundamentals.

Windows & Linux: Windows Server 2016/2019/2022, Windows 10/11, Ubuntu, Red Hat, services, event logs, patching, user administration, file permissions, SSH and remote administration.

System Administration: Active Directory Domain Services (AD DS), users/groups, Group Policy (GPO), DNS, DHCP, file servers, SAN, backup, recovery and endpoint troubleshooting.

Networking & Tools: TCP/IP, subnetting, routing, switching, VLAN, VPN, proxy, firewall rules, Wireshark, Nmap, Metasploit, VMware, Hyper-V, Ansible, Bash, Python, HTML and SQL.

AZURE ADMINISTRATION TASKS – HANDS-ON PRACTICE

- Create and organize Resource Groups; apply naming conventions, tags and resource-level organization.
- Create Azure Virtual Networks and subnets; configure NSG rules to control inbound and outbound traffic.
- Deploy Windows and Linux virtual machines; configure VM access using RDP and SSH and review disk/network settings.
- Configure and troubleshoot remote connectivity, including RDP/SSH access, public/private IP addressing and firewall rules.
- Review private network connectivity scenarios and study site-to-site VPN Gateway configuration for on-premises-to-Azure connectivity.
- Assign Azure RBAC roles at subscription, resource-group and resource scopes; apply least-privilege access concepts.
- Create storage accounts and explore Blob/File storage, containers, redundancy and access-control options.
- Configure Azure Backup concepts using a Recovery Services vault; review backup policies and VM restore workflow.
- Use Azure Monitor metrics, Activity Log and Log Analytics concepts to investigate resource health and operational issues.
- Review Azure Policy, resource locks, tags and cost-management practices for basic governance.

PROFESSIONAL EXPERIENCE

Server Administrator | ARKCA Corporate Solutions Pvt. Ltd.

- Support day-to-day server administration and IT infrastructure operations.
- Assist with system maintenance, operational support and troubleshooting.
- Support network and end-user connectivity investigations as required.

Assistant IT Administrator cum Technical Trainer | Jetking, Bhubaneswar

- Assisted with day-to-day IT administration and system maintenance.
- Supported Active Directory user management and Group Policy tasks.
- Managed lab systems, operating-system installation, updates and backup activities.

PROJECTS

Advanced Office Administration — Bash, Python and Ansible.

EDUCATION

M.Sc. – Advanced Networking and Cyber Security | Brainware University | 2025
B.Sc. (Hons.) – Advanced Networking and Cyber Security | Brainware University | 2023

CERTIFICATION / TRAINING

Microsoft Azure Administrator (AZ-104)
